NEW! Advanced Auto-Set™ now includes five different wire/gas combinations and .024-inch (0.6 mm) wire capability. The easiest welder to use just became more versatile.

- Wire/gas combinations include Flux Cored, Mild Steel with 100% CO₂, Mild Steel with C25, Stainless Steel, and Aluminum with spool gun
- Select the wire type and gas being used
- Set the wire diameter, and select from .024, .030 and .035 diameters. A blue LED indicates that Auto-Set is activated
- Dial in the thickness of what you’re welding
- Start welding with the exact parameters you need!

NEW! Inverter technology combines best-in-class arc characteristics with the portability of a 38-pound machine. The arc is extremely forgiving to variations in arc length and travel speeds.

Multi-voltage plug (MVP) allows connection to common 120 or 240 V power receptacles without the use of any tools— simply choose the plug that fits the receptacle and connect to the power cord.

NEW! Angled cast-aluminum drive system with calibrated tension knob creates consistent feeding and easy setup for up to 15-foot MIG guns.

NEW! Quick Select™ drive roll makes setup quicker by offering three grooves—two for different size solid wire and a third for flux-cored wire.

NEW! Auto Spool Gun Detect™ automatically detects when a MIG gun or spool gun is connected eliminating the need for a switch.

NEW! Fan-On-Demand™ power source cooling system operates only when needed, reducing noise, energy use and the amount of contaminants pulled through the machine.

NEW! Smooth-Start™ provides a smooth, spatter-free start. It’s the best-starting machine in the small MIG machine category.

Thermal overload protection shuts down unit and activates the over temperature light if airflow is blocked or duty cycle is exceeded. Automatically resets when unit cools.

Uses 4- or 8-inch (102 or 203 mm) spools and can be set up to weld with .024 – .035 inch (0.6 – 0.9 mm) solid wire and .030 – .045 inch (0.8 – 1.2 mm) flux-cored wire.

Comes complete with:
- Power source
- 6.5-ft. (2 m) power cord with MVP plugs for 120 V and 240 V
- 10-ft. (3 m) M-100 MIG gun and cable assembly
- 10-ft. (3 m) work cable with clamp
- Flow gauge regulator and gas hose for argon and AR/CO₂ mix
- Hobart® spool of .030-in. (0.8 mm) solid wire
- Two contact tips for .030-in. (0.8 mm) wire
- Quick Select™ drive rolls for .024-in. (0.6 mm) or .030/.035-in. (0.8/0.9 mm) solid wire, and .030/.035-in. (0.8/0.9 mm) flux-cored wire
- Material thickness gauge #229 895
- Two tip guards
- Hook-and-loop cord wraps

Note: Shielding gas and safety equipment not included.

Welder is warranted for three years, parts and labor. Gun warranted for ninety days, parts and labor.
**Auto-Set™ mode**

Auto-Set eliminates guesswork and saves you time on setup. Turn wire selector knob to select the wire and gas combination being used. Turn wire speed control fully clockwise to select Auto-Set mode and set the wire diameter to either .024, .030 or .035 inch. The Auto-Set light indicates mode is activated. Then select material thickness using the Auto-Set control. Use Auto-Set when you want the speed, convenience and confidence of pre-set controls. Auto-Set automatically sets your welder to the proper parameters. It’s available for welding with .024-, .030- and .035-inch steel and stainless steel wires, .030- and .035-inch flux-cored wires, and .030- and .035-inch 4043 aluminum wires with the Spoolmate 100 spool gun. Shielding gas is dependent on the wire being used.

**Manual mode**

When welding outside of Auto-Set capabilities, or if you prefer custom parameters, use manual mode. The parameter chart on the inside of the access door is an easy-to-use guide for determining your voltage and wire feed speed settings. To optimize arc starts, turn wire selector knob to select the wire and gas combination being used. Reference the white areas on the controls when welding in manual mode.
