

SPECIALTY GAS DIVISION: Products & Services

Temporary Bulk Gas Delivery

Often times there are limited supply options for large gas requirements on a temporary or emergency gas basis. Central Welding Supply has made the investment to offer our customers equipment capable of meeting this need; providing high volume and pressure Inert Gas (Nitrogen & Argon) for temporary applications such as:

- Tank Inerting
- Concrete Cooling
- Pipeline Purging
- Pipeline Pigging
- Product Displacement
- Planned and Unplanned Maintenance
- Bulk Tank Repair & Replacement
- Pipeline Pressure Testing

Any of the below temporary gas supply options can be delivered within WA & OR and are a great option for remote locations and job sites. These units are available to rent by the day, week, or long-term.

Portable Cryogenic Trailers:

The 900 Gallon portable trailer mounted cryogenic tank are capable of delivering medium pressure 1-225 PSIG Nitrogen & Argon at 7,500 SCFH. Multi station manifolds and easy access liquid valves make these trailers extremely versatile and great for temporary and on-site operations. Combined with Central Cryogenics bulk gas delivery service, this trailer has the ability to supply a continuous flow of Nitrogen or Argon for tank degassing, inerting, line purging, or any number of large projects.

Portable High-Pressure Tube Trailers:

If a higher pressure Nitrogen requirement is necessary, CWS offers Nitrogen trailers capable of holding 40,000 & 50,000CF of Nitrogen at a storage capacity of 2,400 PSIG, and 60,000CF at 2,800PSIG. These units can be delivered directly to the job site for your tank inerting, pipeline purging, pressurization and pigging requirements.

Do you have a large requirement for Nitrogen or other gases for temporary jobs or specialty applications?
